REYNEIL RODELAS

Pasig City | +639510166794 | reyneilrodelas29@gmail.com

Professional Summary

Information Technology graduate with foundational knowledge of computer networking, IP addressing, subnetting, network security concepts, operating systems, and cloud computing. Familiar with Cisco Packet Tracer, virtualization tools, and introductory AWS lab activities. Brings experience in software testing, issue identification, technical documentation, and systematic troubleshooting through a QA internship and academic projects. Eager to develop practical skills in LAN/WAN operations, network device configuration, wireless networking, and cloud infrastructure as an Associate Network Engineer.

Skills & Competencies

Networking Fundamentals: TCP/IP fundamentals, IP addressing, subnetting, LAN/WAN concepts, basic network topologies, network protocols, and connectivity troubleshooting concepts.
Networking Tools and Technologies: Cisco Packet Tracer, basic network simulation, introductory router and switch concepts, and basic network configuration exercises.
Network Security: Foundational information security concepts, network security principles, access control concepts, and security awareness.
Cloud and Virtualization: Introductory AWS services and guided cloud lab activities; VirtualBox and VMware fundamentals.
Operating Systems and IT Support: Windows operating system fundamentals, software installation and configuration, basic hardware troubleshooting exposure, and technical issue documentation.
Technical Documentation and Problem-Solving: Issue identification, defect reporting, test documentation, record organization, attention to detail, and systematic problem analysis.
Tools and Applications: Microsoft Word, Excel, PowerPoint, Git, GitHub, Visual Studio Code, and Jira.
Professional Skills: Attention to detail and accuracy, Analytical Problem-Solving, Written, Team Collaboration, Adaptability and continuous learning, Willingness to learn new technologies

Education

Bachelor of Science in Information Technology August 2022 – June 2026

Sorsogon State University – Bulan Campus

• Academic Distinction

Professional Experience

Quality Assurance Intern – Tidewrk February – May 2026

• Executed functional and regression testing to verify application functionality and reliability.
• Assisted with issue tracking and validation of fixes to check whether reported problems had been addressed.
• Used a systematic approach to investigate unexpected results, compare actual and expected behavior, and document findings.
• Created and maintained test cases, test data, and technical documentation to support testing activities.
• Communicated testing results and identified issues clearly with team members.
• Collaborated with team members to communicate testing observations and support application quality.

Academic Projects

ScanWizard: Product Locator Application with Customizable Distance Tracker

Role: Full stack developer / QA Manual Tester

Technologies: React Native, Expo, TypeScript, Supabase, React Navigation, React Native Maps, Expo Camera Expo Location

• Developed a mobile application that enables users to scan product barcodes and QR codes and locate nearby stores carrying specific products.
• Implemented customizable distance tracking to allow users to define their preferred search radius.
• Integrated map-based store locations and navigation to support efficient store discovery.
• Developed product and store management features for organizing product availability information.
• Participated in system testing, troubleshooting, database management, and interface development.

Awards: 2nd Best Capstone Award — ScanWizard.

Web-Based Safety and Security Services Unit Management System

Co-Develop Front/Back End Developer

Technologies: HTML, CSS, JavaScript, PHP, MySQL, Bootstrap, XAMPP

• Developed a web-based system for managing personnel, incident reports, schedules, and records.
• Implemented modules that centralized safety and security information for easier access and organization.
• Designed user-friendly interfaces to improve information organization and accessibility.
• Applied web development, database management, and system design principles throughout the project.

Certifications

Certifications & Training: Hardware and Upgrade Support — Cisco Networking Academy; IT Customer Support Basic — Cisco Networking Academy; Networking Basics — Cisco Networking Academy.
